

Nolan Computers' INTEGRATION BRIDGE FOR MICROSOFT® CRM

Nolan Computers'

Integration Bridge for Microsoft CRM

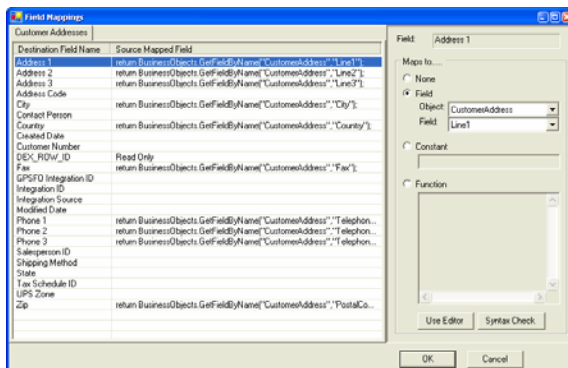

provides efficient, customisable integration between Microsoft CRM and Microsoft Great Plains.

The Nolan Computer's Integration Bridge for Microsoft CRM is built using Microsoft .Net technology and runs as a Windows Service on either the Microsoft CRM server or the Microsoft Great Plains server - No additional hardware is required.

Standard data mappings are supplied with the product out-of-the-box and the Management Console provides an easy, intuitive interface for setting up and customising the integrations between one-to-one or many-to-many Microsoft CRM business units and multiple Microsoft Great Plains companies.

Available data transfers between Microsoft CRM and Microsoft Great Plains include:

- Account/Customer and addresses
- Product/Item & pricelists
- Quote/Order/Invoice/Return transactions
- Case/Service call transactions
